Contributions Implementation

Transactions are building

1m
transactions

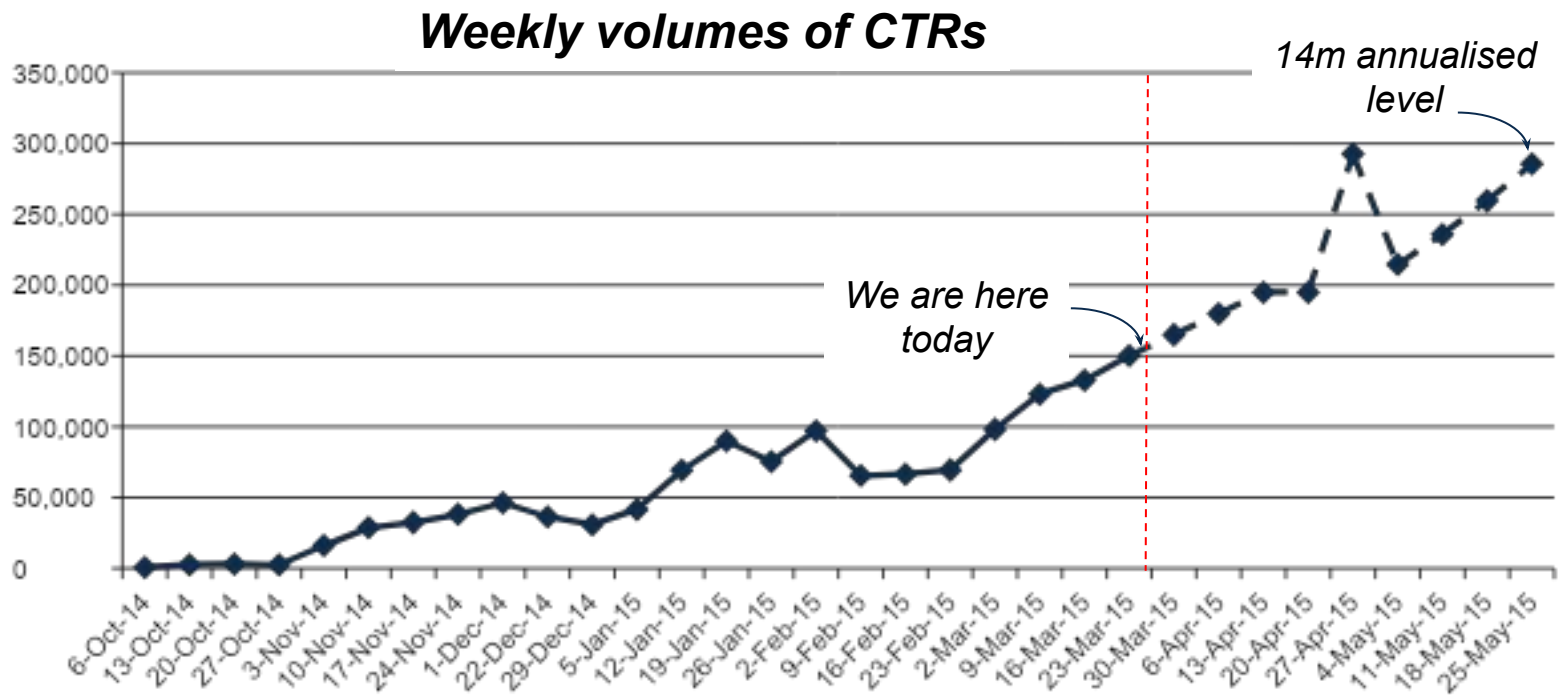

*Milestone passed in early March –
total contributions
using SuperStream so far*

*Will do another 0.5m
for month of March*

*And in May
will do 1m in one month*

Contributions Implementation

Payroll solution providers

Tips for getting ready

- Work out your product strategy for SuperStream compliance
 - Tip: focus on your flagship or high volume products
- Commit to a product release date
- Back up your SuperStream compliance claims
 - Obtain third party certification (even for SAFF products only)
 - Get scheduled into the induction process = cross-certified product!
- Organise end-to-end testing (before entering induction)
- Keep the ATO informed so we can assist where needed and ensure you get into induction (if you need to) at the earliest opportunity
- Let your clients know what your SuperStream readiness plan is!

Certified Product Register

Helping employers understand your product readiness

SuperStream Certified Product Register

This register enables employers to identify the readiness of payroll software and other service providers to meet SuperStream requirements. The ATO does not endorse or recommend any entity placed on this register. Any claims made should be read in conjunction with a vendor's terms and conditions. The ATO will update this register regularly based on the progress an entity has demonstrated through the phases of testing, certification and readiness to comply with SuperStream. New products/services will be added as they fulfill minimum entry requirements.

Certification levels

- **GOLD:** Conforms with the testing requirements for all data and messaging for SuperStream
- **SILVER:** Conforms with the testing requirements for data and messaging for SuperStream as send only profile
- **BRONZE:** Conforms with the testing requirements for data fields only for SuperStream

SuperStream ready

A product or service that is 'SuperStream ready' has been certified as a complying solution and has completed the entry requirements for use by employers in a SuperStream channel.

[More information on SuperStream is available via this link to the ATO's website.](#)

Our current focus

ATO is focussed on these priorities

- Assisting employer solutions become SuperStream ready – with a primary focus on enabling leading payroll solutions
- Supporting funds yet to complete induction and ensuring they meet their implementation deadline by 30 June 2015
- Reminding medium to large employers to finalise their implementation by 30 June 2015 – our message is that the window is closing fast
- Building awareness of SuperStream in small business and urging them to actively selecting a SuperStream solution for their business for implementation – laying the foundation for a sustained campaign over the next 2 years.

Important Initiatives

Some key activities in train

- Regional campaign targeting small business awareness in 23 regions around Australia
 - Completed successful first event in Bathurst (NSW Central West) several weeks ago
 - Next event is in Albury-Wodonga
 - Publish schedule and suggested co-marketing opportunities on our website as we finalise arrangements
- Industry campaign building partnerships with industry associations and targeting small business awareness in 25 industry segments
 - Developing industry specific case studies and marketing material
 - Publish further detail on our website as we finalise arrangements
- Employer-SMSF media campaign on SMSF nomination of e-commerce details

UNCLASSIFIED – For External Use Only
Published advice that employer can issue a new choice form to a an employee with an SMSF and request completion within 28 days- provided reasonable prior notice given to employee

The Version 2.0 discussion

The process so far

- In collaboration with industry, the ATO has tracked and published for consultation a series of proposed refinements and extensions of the Superannuation Data and Payment Standard.
- The full extent of these changes has been brought together and are reflected in the 'version 2.0' *draft* schedules
- Consultation period closed on 20 March and ATO is considering way forward

Early feedback

- The ATO is committed to a major release of G2B functionality in early 2016.
 - Considering whether we can push this a bit later than February 2016 and possibly reduce its scope
- 'Version 2.0' will be a progressive upgrade over time (not a big bang)
 - Looking at creating twelve monthly change windows from there with advance schedule of proposed scope of changes out to three years
 - Will publish this forward view along with a versioning and change management process
- Considering how we align with proposed single-touch payroll changes and timing to ensure there is an integrated change planning and lead-time with software developers
 - Noting STP is still in proposal at this point and timing/scope is not yet determined.
